

Dear Friends,

Exactly 43 years ago today, *Roe v. Wade* legalized abortion. Since then, over 58,000,000 babies have lost their lives to abortion. In addition to this heartbreaking reality, social science shows that abortion has had a morbid impact on health, marital stability, and sexual mores. By exposing the social scientific and biological facts about abortion, we will empower women, families, and our nation to overcome this dangerous practice.

## FEATURED ON MARRIPEDIA

---

### Biology of the Abortion-Breast Cancer Link

Did you know that having an abortion increases a woman's risk factor of getting breast cancer? Check out [Marrimedia.org](http://Marrimedia.org) to learn about the biology behind this link.

## RESEARCH HIGHLIGHTS

---

### Abortion and Women's Mental Health

Dr. Priscilla Coleman of *Bowling Green State University* highlights 30 recent studies that show how abortion hurts women's mental health. Check out Dr. Coleman's [analysis](#) and read more about the effects of abortion on [Marrimedia](#).

### Having More Children May Slow Aging

[New research](#) indicates that having more children could slow down the rate of biological aging. Read about other interesting pregnancy-related topics on [Marrimedia](#).

### Public Attitudes Toward Abortion

The American Enterprise Institute recently published a report on public opinion toward abortion over the last couple of decades. Check out the report [here](#) and learn about the effects of abortion on the U.S. population on [Marrimedia](#).

Sincerely,

Patrick Fagan

Director of the Marriage and Religion Research Institute (MARRI)
