

MARRI FINDINGS

ON RELIGION & FAMILY

MAPPING AMERICA

Adolescent Sexual Intercourse and Fathers' Response: Analysis by Family Structure and Religious Worship

71.6% of teens from intact worshipping families were likely to feel that their father would strongly disapprove if they engaged in sexual intercourse according to the National Longitudinal Survey of Adolescent Health (Add Health). Read the full findings on [our website here](#).

NOTABLE RESEARCH - - - FROM THE CDC

Sexual Activity, Contraceptive Use, and Childbearing of Teenagers Aged 15-19 in the United States

In 2011-2013, 44% of never-married female teenagers aged 15-19 and 47% of never-married male teenagers aged 15-19 had ever had sexual intercourse. To read the entire data brief by the CDC on the sexual activity, contraceptive use, and childbearing of teenagers, [click here](#).

SOCIAL SCIENCE AND ABORTION

Round Three, the Corruption Continues: Academia and Abortion.

"The academic corruption MARRI previously [described](#) is not limited to same-sex marriage data: it is also present in abortion research." [Read the entire post here](#).
